

CLAIMS

1. A heating radiator or towel rail, particularly for installation in a bathroom such as a hotel bathroom, incorporating a TV or similar media/audio-visual/audio or visual display device with either built in, or separate speakers.
2. A heating radiator or towel rail as claimed in Claim 1, wherein the radiator/towel rail is heatable electrically.
3. A heating radiator or towel rail as claimed in Claim 1 or Claim 2, wherein the radiator/towel rail is adapted to be connected to a (water filled) central heating system and hence is of any industry-standard radiator/towel rail length to enable use to be made of existing piping/connections with minimal plumbing work.
4. A heating radiator or towel rail as claimed in any preceding claim, wherein the TV or similar device is inset into the radiator/towel rail, such that the TV is flush, or substantially so, with a surface of the radiator/towel rail.
5. A heating radiator or towel rail as claimed in any one of Claims 1 to 3, wherein the TV or similar device is surface mounted onto, or into, the radiator/towel rail.
6. A heating radiator or towel rail as claimed in any preceding claim, wherein the TV or similar device, is attached to a back box.

7. A heating radiator or towel rail as claimed in Claim 6, wherein speakers and power supply means are also attached to the back box.
8. A heating radiator or towel rail as claimed in Claim 6 or Claim 7, wherein a cable entry/exit hole is provided in the back box.
9. A heating radiator or towel rail as claimed in Claims 6 to 8, wherein the back box is of stainless steel or other non-rusting material.
10. A heating radiator or towel rail as claimed in Claims 6 to 9, wherein an open front of the back box is closed off by a glass screen.
11. A heating radiator or towel rail as claimed in Claims 6 to 10, wherein the engagement of the glass screen and the back box is in a water and vapour sealing manner.
12. A heating radiator or towel rail as claimed in Claims 6 to 11, wherein a mirror vision film is located over an inner surface of the glass screen.
13. A heating radiator or towel rail as claimed in Claim 12, wherein a black p.v.c. layer, with an aperture appropriate to the size of the TV screen, is located at the inner surface of the mirror vision film.
14. A heating radiator or towel rail as claimed in Claims 6 to 13, wherein the back box is fixed to a frame portion of the radiator/towel rail.

15. A heating radiator or towel rail as claimed in any preceding claim, wherein the TV or similar device is remotely controlled.
16. A heating radiator or towel rail as claimed in any one of Claims 1 to 14, wherein the TV or similar device is provided with manual buttons/knobs.
17. A heating radiator or towel rail as claimed in Claim 16, wherein the buttons/knobs are remotely mounted.
18. A heating radiator or towel rail as claimed in any preceding claim, wherein the TV or similar device is controlled by an external source e.g. computer.
19. A heating radiator or towel rail as claimed in any one of Claims 1 to 16, wherein the TV or similar device is controlled by some form of touch sensor.
20. A heating radiator or towel rail as claimed in any preceding claim, wherein the radiator/towel rail unit is IP rated to enable it to be moisture resistant or even waterproof.
21. A heating radiator or towel rail as claimed in any preceding claim, wherein the radiator/towel rail incorporates a mirror.
22. A heating radiator or towel rail as claimed in any preceding claim, wherein the radiator/towel rail utilises the "mirror vision" principle of a two-way mirror covering the

screen, looking like a conventional mirror when the media type is switched off, but being viewable through when the media type is switched on.

23. A heating radiator or towel rail substantially as herein before described with reference to the accompanying drawings.
